

Ohio Travel Demand Model Users Group Fall Meeting

The meeting was held on Friday, November 8, 2019 at the Mid-Ohio Regional Planning Commission (MORPC) Conference Room. The meeting commenced at approximately 10:00 AM. The meeting started with a welcome and introduction of all attendees. 21 people were in attendance.

Rob Bostrom made a motion to approve last meeting's minutes. Josh Kieselbach seconded. The motion passed. Rebekah Anderson commented that the refreshment fund balance may have been reported inaccurately at the previous MUG meeting. ODOT staff will check on that after the current meeting.

Greg Giaimo motioned to accept one new member (Ting Su). The motion passed.

Rebekah Anderson motioned to elect Ali Makarachi and Lisa Householder to second terms as vice chair and secretary, respectively. Dan Slicker seconded. The motion passed.

New business – There was no new business.

Ben Stabler gave a presentation on *Activity Sim*. The purpose of this project is to create an activity-based travel modeling program that will unify best practices, reduce development and maintenance costs, and promote collaboration. This effort is being led by an association of MPOs for the past six years. All agencies participate in decision-making and set annual development priorities and all pooled funds are managed by the Association of Metropolitan Planning Organizations (AMPO). Activity Sim is like a toolkit with many features, called packages. Ben explained what activity-based modeling entails, what structures and components it includes, data requirements, implementation requirements, and gave a brief tutorial. More information can be found at this website: www.activitysim.org

Lori Duguid presented on *US 33 Corridor: CAV Implementations*. The US 33 Smart Mobility Corridor project is currently underway on a 35-mile section northwest of Columbus, from East Liberty to Dublin, and involves all signalized intersections within the City of Marysville and some in the City of Dublin. The funds for this project came partly from an Advanced Transportation and Congestion Management Technologies Deployment (ATCMTD) grant and a local match from private-public partners, including Union County, ODOT, and Honda to name a few. It involves local loop fiber installation, 94 road side units, and vehicles equipped with on board units. The benefit to US 33 includes work zone warning applications as well as warnings for lane changes, speed changes, and curve speeds. US 33 will be completed by July 31, 2020. Intersections in Marysville and Dublin are equipped and connected with collision avoidance and

pedestrian warning features and will be completed by December 31, 2019. More information can be found at this website: <https://www.33smartcorridor.com>

Rob Bostrom presented on *US 33 CAV Microsimulation Modeling*. The modeling process used for this microsimulation involves a combination of four step travel demand modeling and simulation. The two models chosen for this project are VISSIM and TransModeler. MORPC's model was expanded further west into Union County to include the City of Marysville. They are modeling for 62 intersections, have obtained traffic counts, and are conducting volume balancing. Rob stated that all future models will have a CAV component and noted that simulation has its own benefits, such as better testing on capacity. So far, base year simulation is completed and validation is underway. Next steps include customizing for CAVs, finishing the base year model, and fine-tuning scenarios.

In other business, Citilabs offered training several months ago on Cube Voyager but it was held at a bad time (Singapore time zone). ODOT staff will conduct a poll to determine interest in having Citilabs conduct a similar training for this committee. Rebekah Anderson updated the status of the refreshment fund (which, again, will need to be confirmed due to possible inaccuracies from the last meeting). \$77.35 was spent on refreshments; \$57.35 was donated at the meeting; leaving a balance of \$79.

Lisa Householder will email out PDH certificates.

The meeting was adjourned at approximately 1 pm. The spring meeting will be held on Friday, March 13, 2020 at the Mid-Ohio Regional Planning Commission (MORPC), 111 Liberty Street #100, Columbus, OH 43215.
