

Ohio Conference on Freight, August 15 – 17, 2018

Cincinnati, OH

Be a part of our Freight Conference, we are seeking Presentations for Breakout Sessions!

Visit www.ohiofreight.org to submit a presentation proposal by April 30, 2018.

- Individual Registration is \$300
- Discounted hotel block (\$159 + taxes) at Hilton Netherlands Plaza Cincinnati – Call 1-800- HILTONS (4458667) or visit <https://aws.passkey.com/go/OCFAug2018>
- Partnership Opportunities Available – Contact Lorrie Platt at lp Platt@oki.org or call (513) 619-7670.

OKI Establishment Survey (etc)

Andrew Rohne

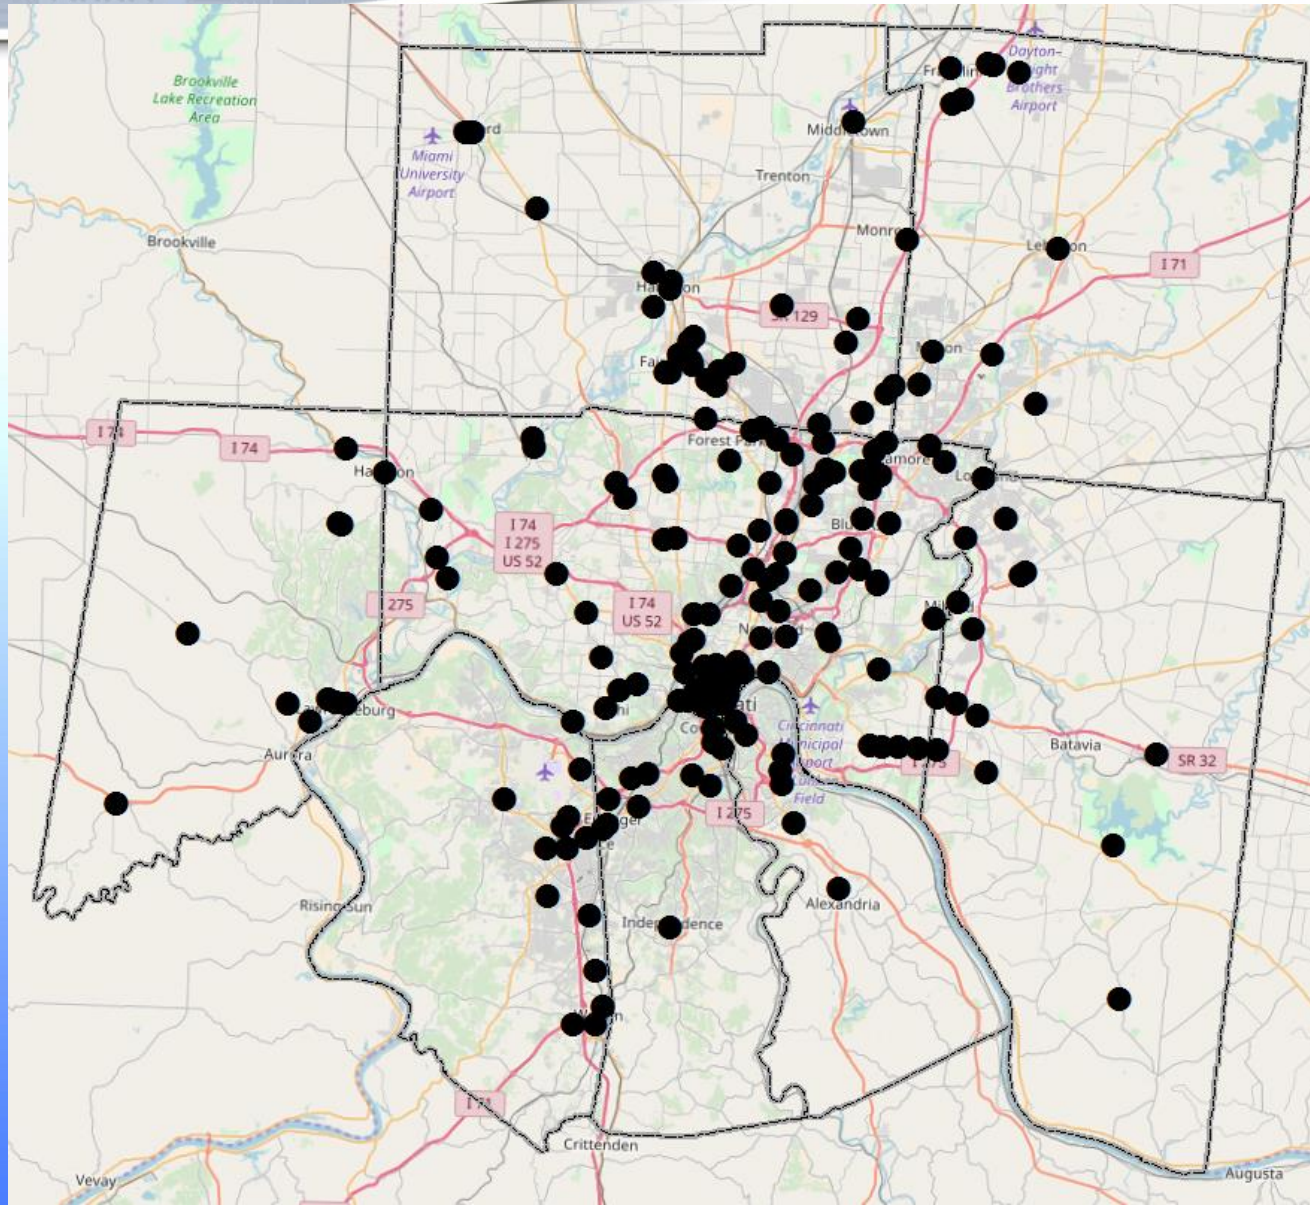

Ohio Travel Demand Model User Group

March 2018

Background

- Surveyed 220 Establishments
 - Employees
 - Visitors
 - Commercial Vehicles
- Sampling Plan based on ES-202/InfoUSA
 - Controlled by states and model categories (11)
 - No schools, kids, malls, airports

Surveyed Establishments

Completed Surveys

- Employees: 1,637 / 4,793 (34%)
- Visitors: 1,670 / 9,044 (18%)
- Commercial Vehicles: 139 / 183 (76%)
(preliminary data!)

Data Collection

- In-person Interviews – Tablet
- Person Counters – automatic and manual
- Commercial Vehicles Counted Manually
- Traffic Counts at Some Locations

Establishment Data

- Provided by D&B or InfoUSA:
 - Name, Address, NAICS
- Provided by Establishment:
 - Employees, Typical Visitors
 - Company Vehicle Counts
 - Hours
- Provided by ETC (with help from Google Maps)
 - Location and Physical Information

Visitor and Employee Data

- Arrival and Departure Times
- Mode
- Location and Purpose
- Number in Party*
- Persons, Workers, Vehicles in HH, HH income
- Age Range

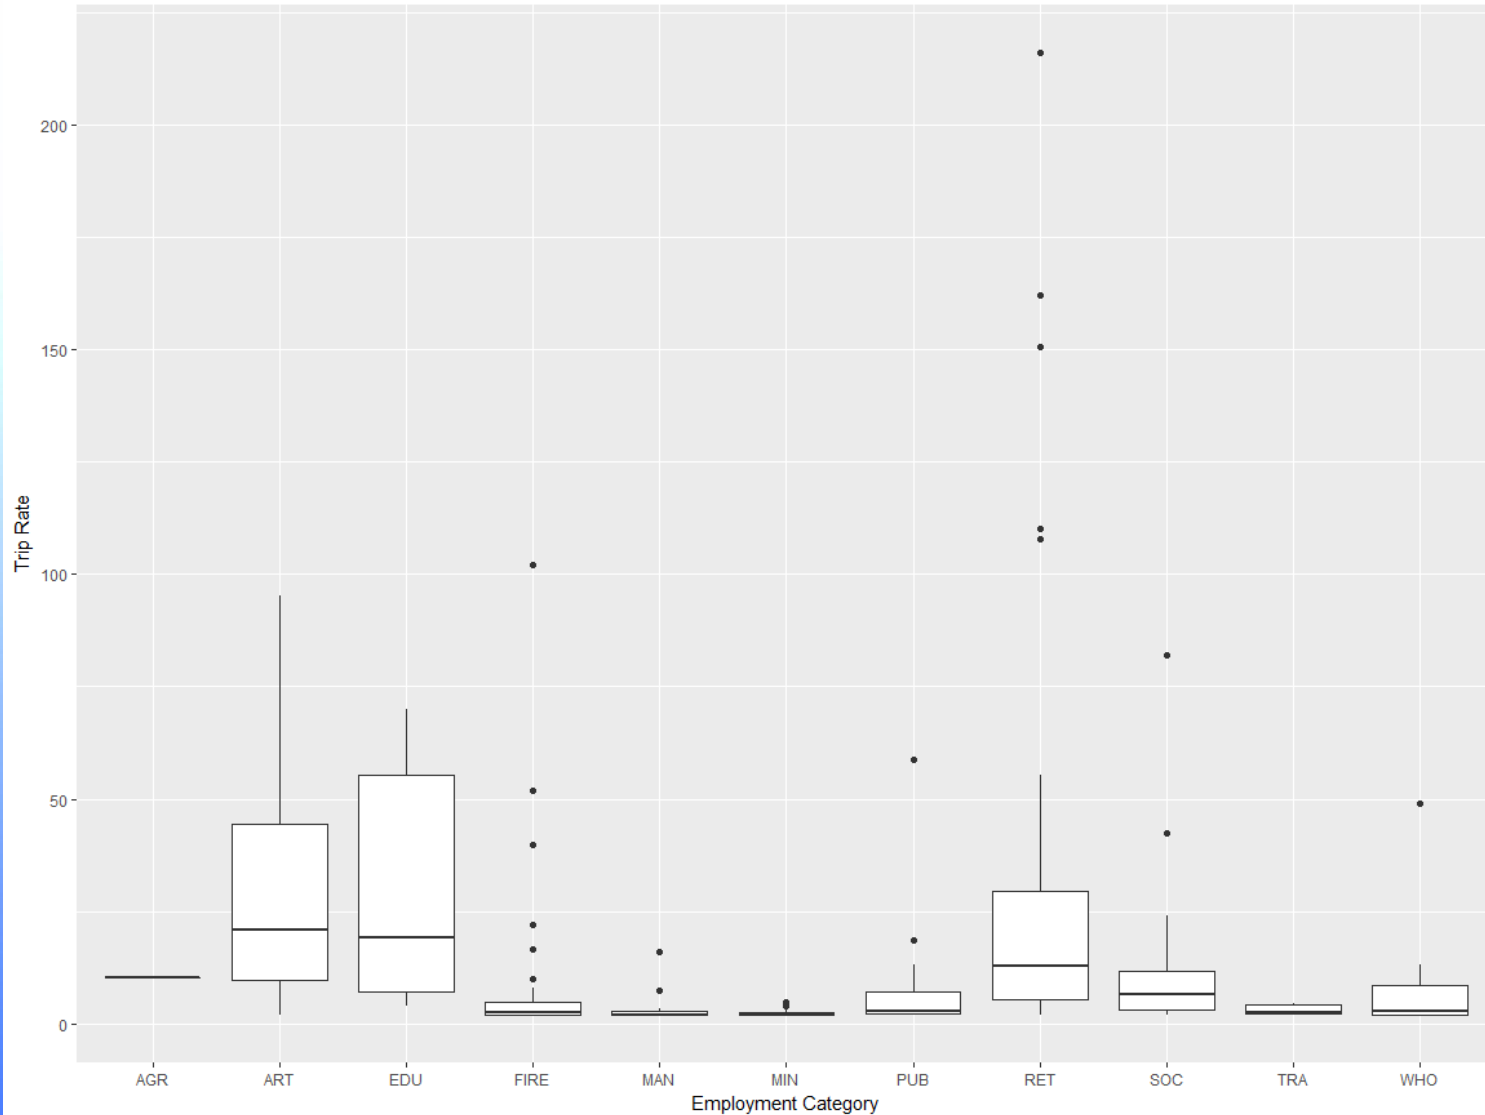

* also collected for refusals

Commercial Vehicle Data

- Type of Vehicle
- Stop Reason (pick/drop, service, “comfort”)
- If pick/drop was full or partial load or deadhead
- Location info (from, to)

Trip Rates

Total Trips per Employee

Data Weighting and Expansion

Used methods based on TRB 18-02139

Kommanduri, Anurag et al. An Enhanced Framework for the Expansion of Establishment Surveys: Case Studies from New York and Phoenix. Presented at 97th Annual Meeting of the Transportation Research Board, Washington, D.C., 2018.

Data Weighting and Expansion

1. Weight Employees by Establishment
2. Expand Employees to Region
3. Weight Visitors to Establishment visitor counts
4. Expand Visitors to Region

Current Status

- Not happy with rates
 - Weighting and Expansion issues?
- Looking at use in Activity Based Model
 - Strategy identified by WSP

Issues Faced

- Establishment Recruitment
 - Fixed by sending advance letter on OKI letterhead AND OKI envelope
- Some specific location under-response
 - Sent surveyors out on same day-of-week
 - Only 2 or 3 locations
- Mixed one location after collection
 - ETC surveyed another location

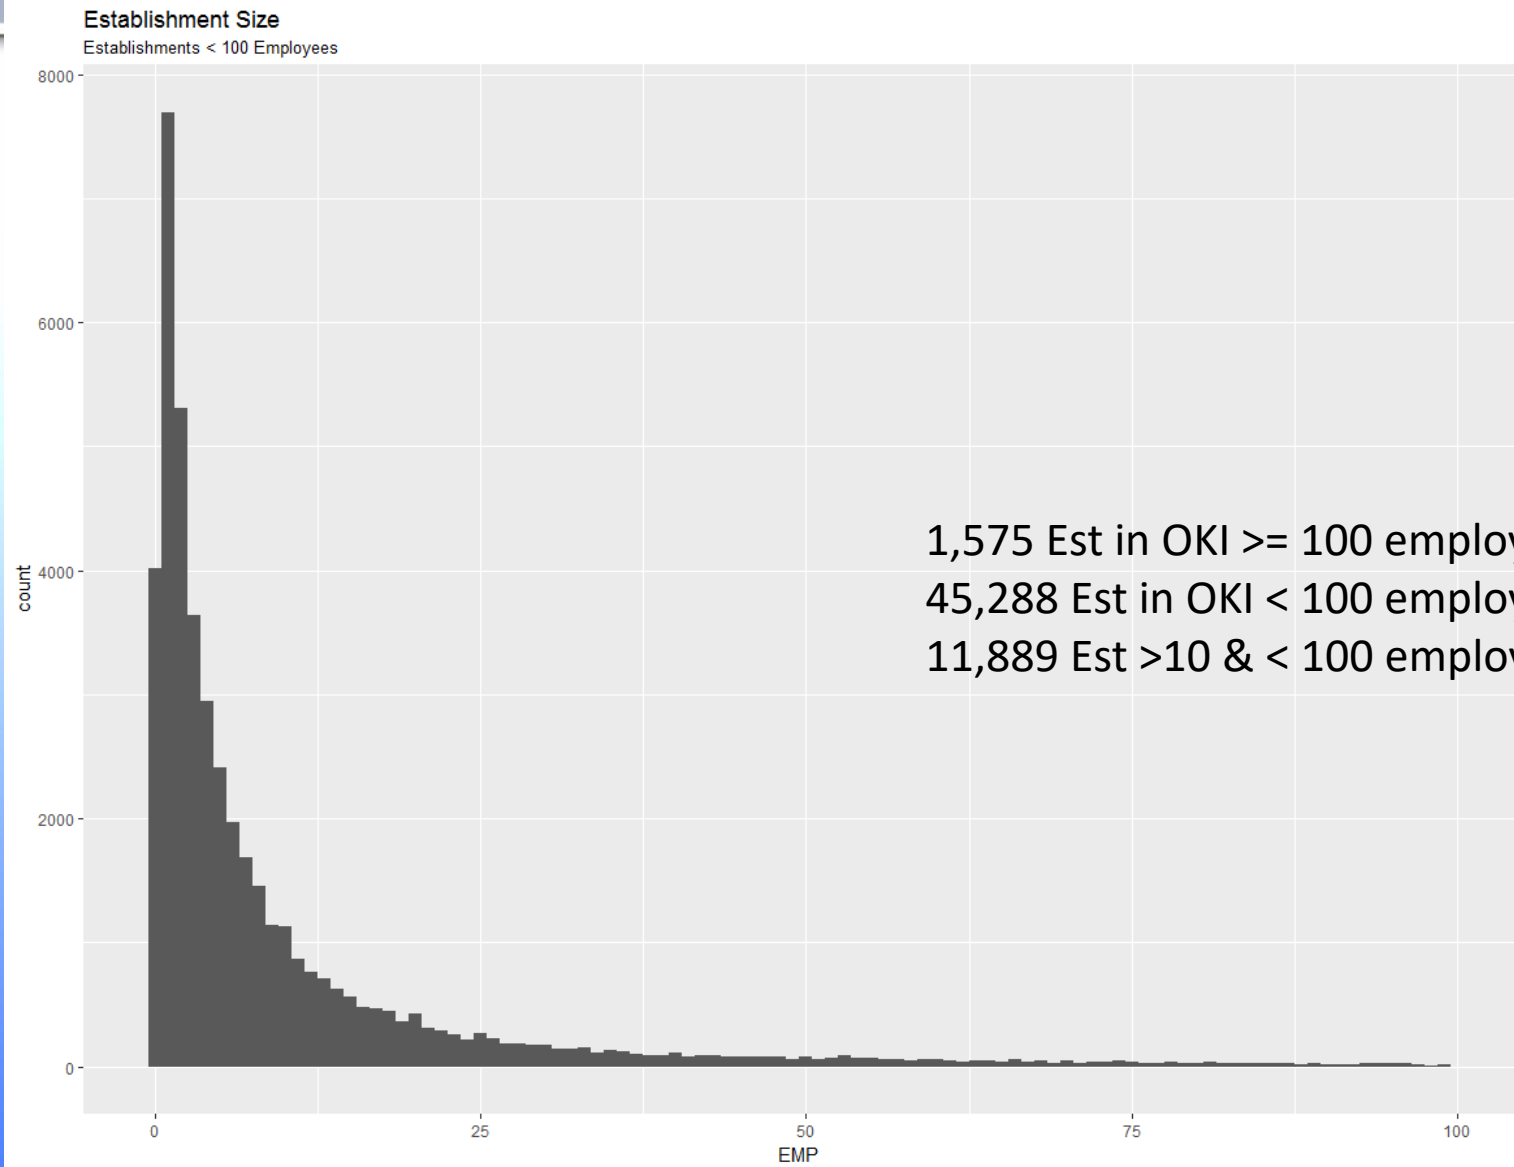

Lessons Learned (1/2)

- Tablets + Interviews Worked Well
- Possibly Stratify by Establishment Size
 - Perhaps combine employment categories
- Vehicle counts not useful
- Surveyor comments VERY useful (in most cases)
- Automated person counts not very useful
 - MANUAL!!!

Lessons Learned (2/2)

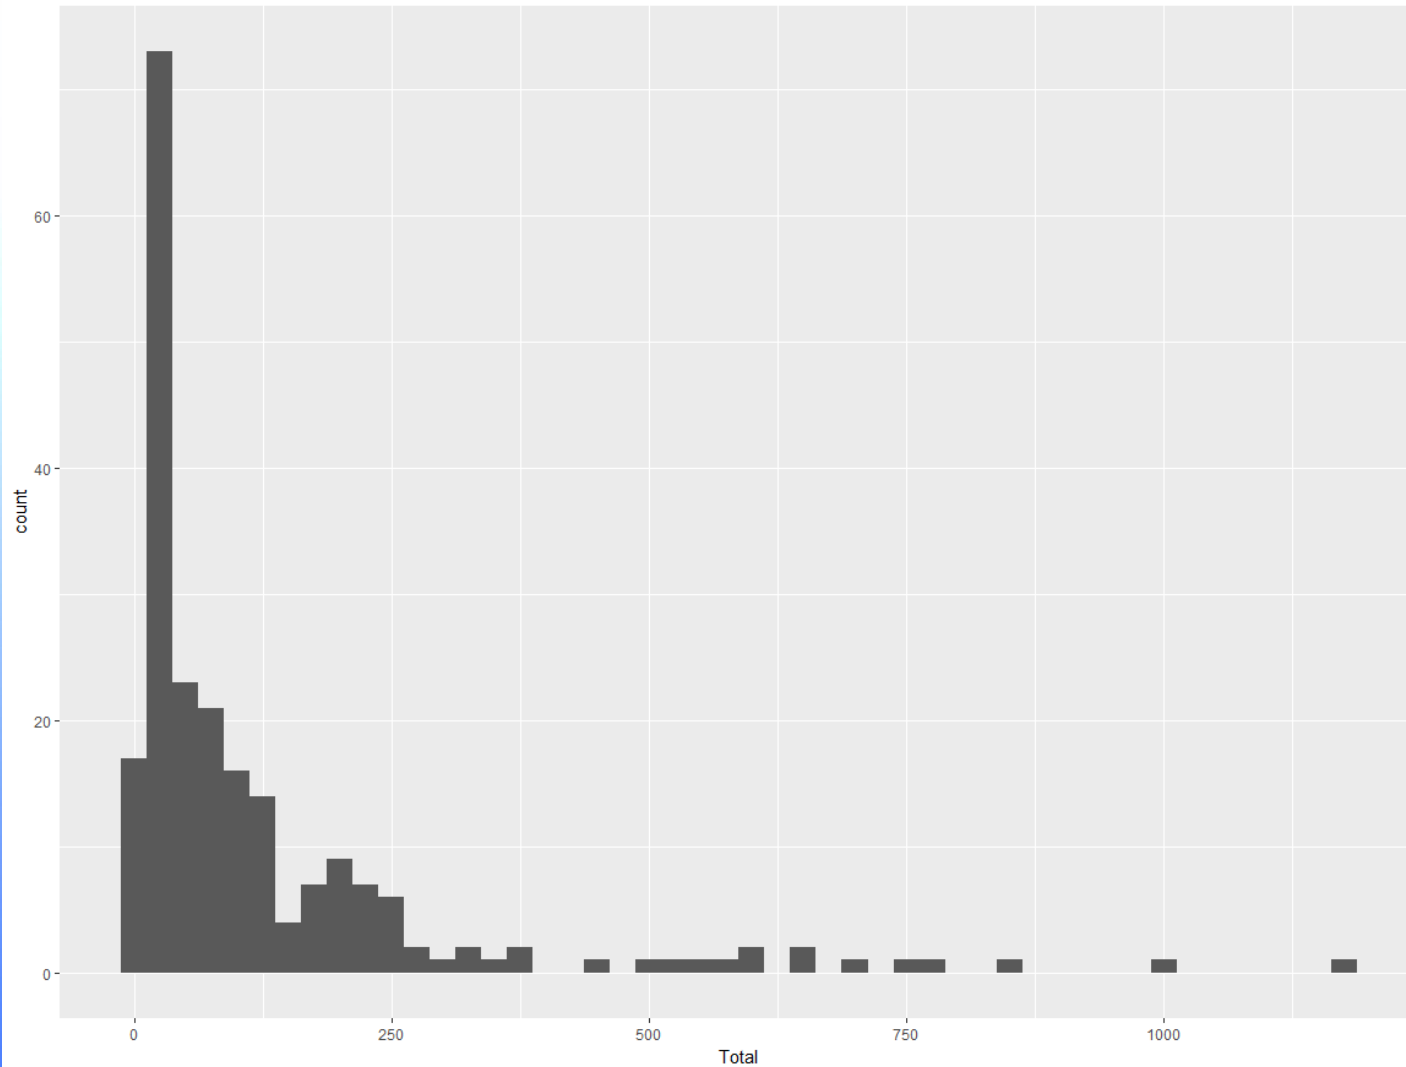

- Better Control Over Locations
 - Churches (1 or 2 ok, we had several)
 - Apartment/community management offices (intermingling of home trips)
 - No parks
 - Very Small Use on Weekdays
 - Difficult to Relate to Various Uses
 - Large and Diverse Areas
 - Possibly Nonlinear on Weekdays?

Why Manual Counts?

Why Manual Counts?

Establishment Person Counts

(there's more after this, but it's not about the Establishment Survey)

Ohio River Bridge Counters

- Permanent Radar Counters
- Working with KYTC to install
- 5 of 7 bridges near complete
- Remaining 2 in next FY
 - By OKI

Ohio • Kentucky • Indiana
Regional Council of Governments

Challenges

- Cabinet Size Changed by KYTC
 - Cabinets too small, difficult to work in
- Questionable Consultant Selection
 - Apparent lack of experience with equipment
 - Missed details (e.g. forgetting to turn on breakers)
- New-To-Us Tech
- Vendors (Modem reseller and Radar) not in area
 - They are helpful, but only phone and email support

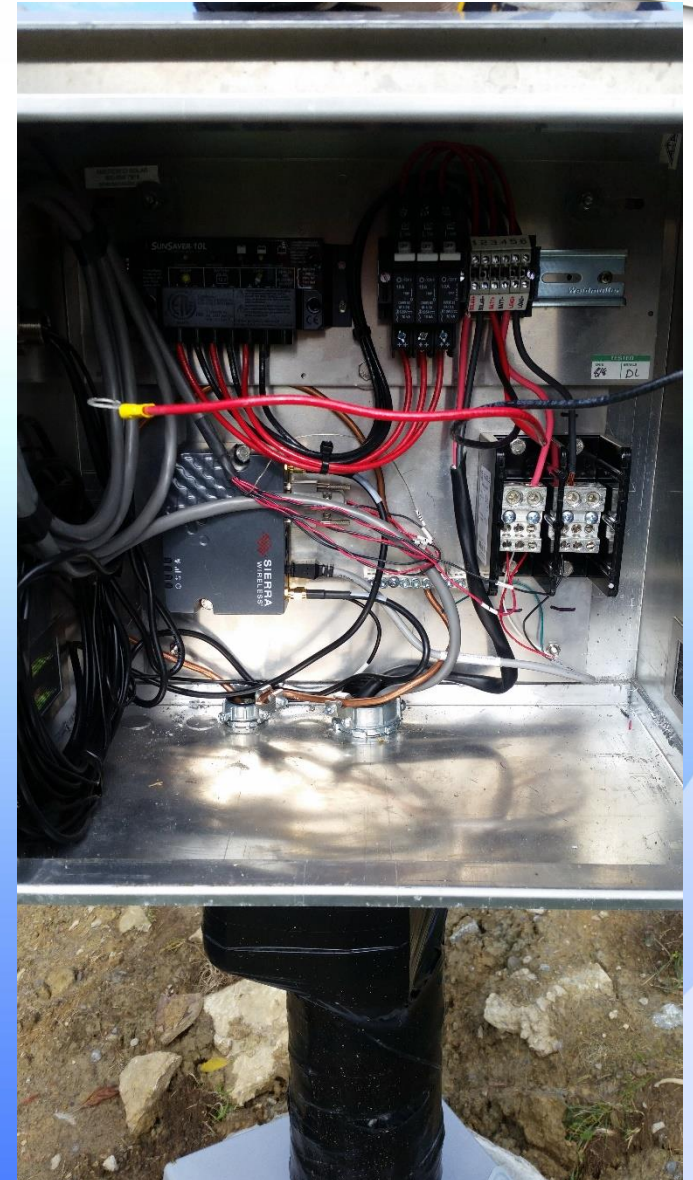

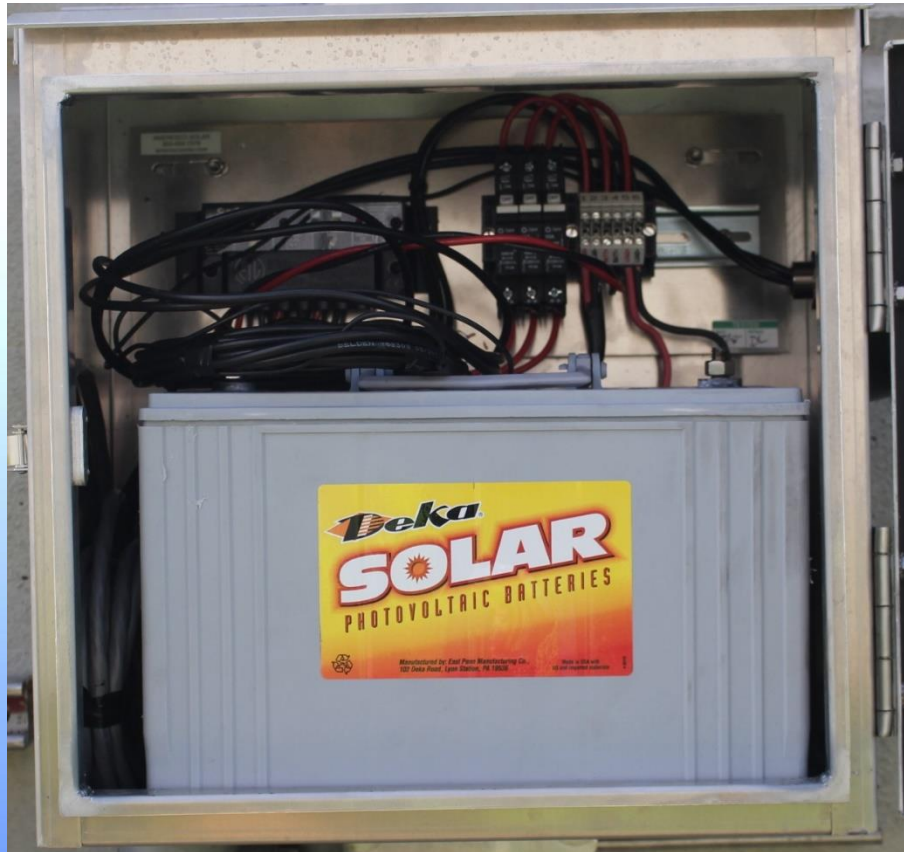

More Challenges

- Two Modem Failures
 - No word on why – we've asked
- One *potential* Radar Failure
- Lack of Cell Plan Documentation
 - Found important config params via web forum
